- Koc University** | 2017 | BA & Media and Visual Arts
- University of Hong Kong** | 2016 | Business Administration
- American Collegiate Institute** | 2013 | Turkish-Math

Work Experience

Senior Lead Experience Designer, Commencis

Nov 2022 — Present

Own the end-to-end product vision and roadmap of [UserHear](#), AI powered app review analytics platform, translating user insights and business goals into actionable product strategy while remaining hands-on in UX and UI execution with the design team.

Contributing to [Commencis AI products](#) to shape human-centered AI solutions by aligning user needs, design principles, and technical possibilities across ideation, design, and delivery.

Drive organization-level design impact within the largest private bank of Turkey by shaping scalable UX practices and design-led change; ensuring consistent, high-quality user experiences across complex systems and stakeholders.

Product Designer, Armut/Homerun

Aug 2020 — Oct 2022

Part of Fulfillment and Satisfaction product team working on increasing fulfillment rate of Armut's service providers. My main focus was improving experiences in reservation model services such as massage, home cleaning and manicure & pedicure. I helped improving fulfillment rate of our team by 0.6 pp.

I also contributed design system development and maintenance for Armut/Homerun's design system in Figma, together with initiating international research processes for Homerun UAA, Romania and Egypt with CX Team.

Design Researcher and Producer, TU Delft

May 2018 — Sep 2019

|| Student assistant for graduate master class Design for Interaction Research Methodology and Thing-Centred Design. Responsible for course content and material preparation. Supported 200+ master students in their daily basis activities and final projects.

|| Ran a research project with Associate Prof. Nynke Tromp for operationalizing social design through master thesis review of TU Delft's IDE students. Assessed social design mechanisms for projects conducted in the faculty.

|| Helped program coordinator Prof. Elisa Giaccardi with preparations of Dfl Program Welcome day during day content and material preparations.

|| Developed projects for Nederlandse Spoorwagen, [Naasten in Beeld](#), and [Oosterwold Area Development Team](#) to tackle their vital business and experience needs.

Interaction Designer, KUAR

May 2015 — Sept 2017

Designed and researched for understanding emotional communication. Developed AR application concept design and prototype where product aimed at tracking user real time emotion and expressing it with the other person's desired emotion state.

We shared our work in [Proceedings](#) and [Extended Abstracts](#) of CHI 2018.
